Track Record

MAIN PROJECTS ONLY

Track Record - Higeco More main projects

(Last update: May 14 2024)

OUR NUMBERS

Overview

With more than 15 years of experience, Higecco More guarantees customers a complete service that includes design, supply and commissioning of monitoring and control systems for renewable energy power plants.

We design our systems ensuring optimization according to specific requests. Monitoring and control devices are supplied from our in-house production facility and they can integrate third-party devices to offer complete SCADA solutions. We install and commission our systems, always guaranteeing the customer a practical and problem-solving approach and dedicated after-sales support.
