Track Record - Higeco More main projects

(Last update: June 2025)

OUR NUMBERS

Overview

With more than 16 years of experience, Higecco More guarantees customers a complete service that includes design, supply and commissioning of monitoring and control systems for renewable energy power plants.

We design our systems ensuring optimization according to specific requests. Monitoring and control devices are supplied from our in-house production facility and they can integrate third-party devices to offer complete SCADA solutions. We install and commission our systems, always guaranteeing the customer a practical and problem-solving approach and dedicated after-sales support.

Penomone 150 MW - Panama

Roggeveld 140 MW - South Africa
